

Impacta Rubber

The Product

John C Wilkins Impacta Rubber is as adaptable as it is resilient. It is designed for real building sites where material gets moved, knocked and rained on: Impacta Rubber can handle all this and still perform. It is designed to go under screeded floors, meaning it won't be damaged if flooring is taken up at a later date. Impacta Rubber complies with Part E of the Building Regulations and meets relevant Robust Detail standards, although it is not yet RD certified. This product is not only extremely effective, it is also extremely cost-effective.

The Facts

- Robust resilient underscreed layer system that complies with RD performance targets
- Puncture proof material
- Suitable for pre-cast and solid concrete floors (minimum weight 335kg/m³)
- Minimal change to traditional floor and ceiling construction
- Accepted by NHBC for ADE compliance

Specification

Composition	Airborne Dn tw+Ctr	Impact Ln tw
