

Impacta Tile System

The Product

Tiled floors in bathrooms and kitchens may be the ideal surface but the impact noise transmitted by the tiles has led some people to choose other less elegant and hygienic options. John C Wilkins Impacta Tile System dramatically reduces the impact sound from tiled floors without needing to change your choice of tiles. The pack contains all the materials needed to install the system and you won't be left with lots of paid-for but unused material.

The Facts

- Enables the use of tiles in compliance with Part E of the Building Regulations
- Any stone or ceramic tiles can be used
- All materials required are included in the Impacta Tile System pack
- Highly cost-effective for use in small rooms
- Suitable for new build or refurbishment projects; and for use with underfloor heating

Specification

- **Impact sound insulation performance: 19dB Building regs minimum requirement: 17db**
- **Single pack coverage is 0.9m (Supplied in full packs only)**

Installation

The acoustic underlay is bonded to the sub-floor and the tiled surface is bonded to the underlay. For expert installation, we offer our own installation service anywhere in the UK. Your installation will be performed to the highest standards by skilled and experienced tradesmen. These experts understand the importance of fitting acoustic materials absolutely perfectly and they have the specialist skills to ensure your John C Wilkins materials are fitted correctly every time. As they are both experienced and skilled, they are also able to provide a highly efficient and extremely cost-effective service.

For further details, call John C Wilkins Acoustic Installations on 01204 548400.
