

## Acoustic Isolating Strip

### The Product

Acoustic Isolation Strips are used for preventing sound transfer, by isolating partitioning or party walls in all forms of construction, where there is any point of contact.

John C Wilkins Isolating Strips, which are made from recycled rubber, are 5mm thick and available in any widths, in 10 metre rolls.

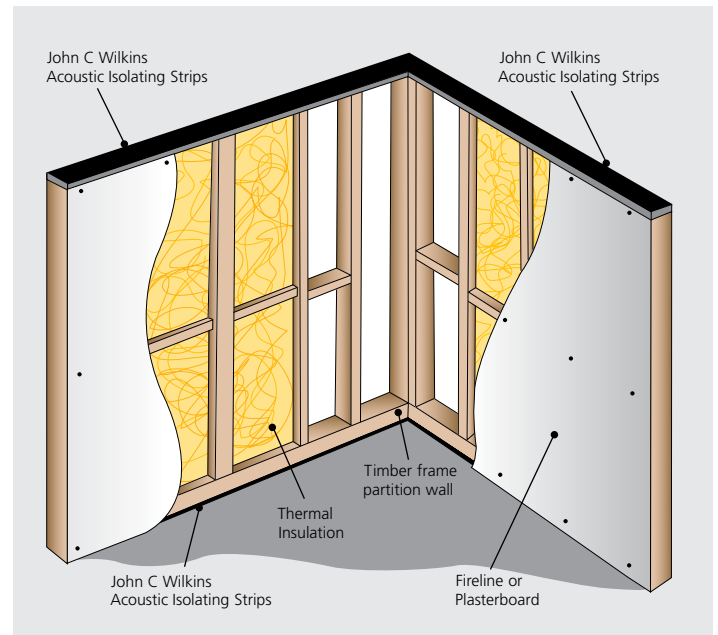

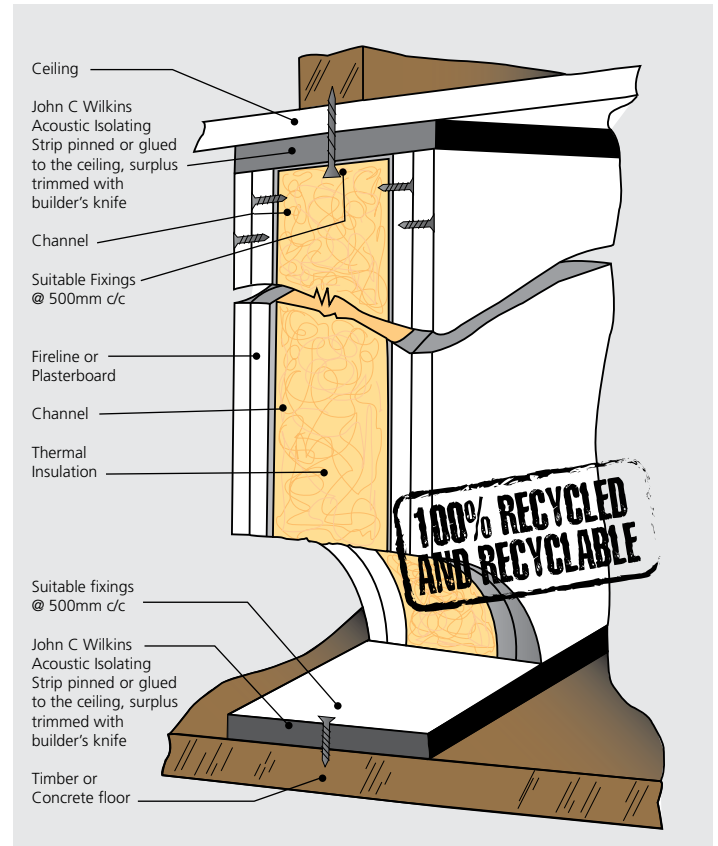

### Applications

- New build
- Refurbishment / change of use
- Partition and party walls
- Floor joists

### Installation

For expert installation, we offer our own installation service anywhere in the UK. Your installation will be performed to the highest standards by skilled and experienced tradesmen. These experts understand the importance of fitting acoustic materials absolutely perfectly and they have the specialist skills to ensure your John C Wilkins materials are fitted correctly every time. As they are both experienced and skilled, they are also able to provide a highly efficient and extremely cost-effective service.
