Product Brochure

Manufactures of acoustic movable/operable wall partitions & sliding folding systems

Product details

JCW 100

We manufacture each panel to suit your needs, acoustics range from 37dB to 57dB.

Each panel made easy for you to manoeuvre.

Panel surfaces from veneer to laminates, enabling us to work with your interior design needs.

Manufactured to meet the BB93 acoustic requirements for education installations to school, colleges and Universities are second nature.

JCW 200

Product designed for a quick and easy set up operation.

Each panel is hinged together which allows you to move all the panels in one swift effort. We incorporate an access passdoor as standard to give you extra space flexibility. Acoustics range from 37dB to 50dB.

With each project and opening being different this product is ideal when there is no structural support as this system can be floor supported.

JCW 800

This product has been designed with your economical budget in mind, Teachwall 800 is the versatile, durable and cost effective solution.

The acoustic levels range from 15dB to 35dB.

Teachwall 800 can either be top hung or floor supported giving you the flexibility within your building.

The fabric panel finish is fully washable and contains antimicrobials to protect against mildew, mould, fungi and bacteria making it the ideal solution for medical centres and hospitals.

JCW 100

*Typical installations -
classrooms - office space - meeting
rooms - conference - seminar rooms
- function rooms - churches*

Specification	
Panel thickness	85mm/110mm
Maximum panel height	10000mm
Maximum panel width	1250mm
Minimum panel width	700mm
Acoustic rating	37dB to 57dB

Sound attenuation	Panel weight
40dB	40 Kg/m ²
44dB	44 Kg/m ²
48dB	48Kg/m ²
50dB	50 Kg/m ²
53dB	53 Kg/m ²
55dB	55 Kg/m ²
57dB	57 Kg/m ²
