

CASE STUDY

JCW Acoustic Supplies

Summer 2014

York Road, Maidstone

westridge

goldinghomes

Westridge Construction were contracted to build a £1.2million development of 12 two-bedroom apartments for affordable rent by Golding Homes. The development in York Road, Maidstone, has been built with support from the Homes and Communities Agency.

The three-storey building, to be known as Woodville House, transforms the site which was a former garage site. The new homes offer residents outstanding views of historic Mote Park, the development was specifically planned to complement the public footpath approach to the listed Ice House in the adjacent parkland.
