

CASE STUDY

Redhouse Park Area 4, Milton Keynes

Client: Avant Homes

Product installed: JCW Absorbent Sound Screen 87m at 4.5m high

JCW Acoustic Supplies received the enquiry for this project mid-November 2016 by Avant Homes who recently acquired the development from a previous developer. Due to planning conditions by the local council JCW were given the task of manufacturing, supplying and installing 87m of a 4.5m high JCW Absorbent Sound Screen by Christmas 2016. After offering a quick turnaround on technical advice and quotations the order was placed and a team of two from JCW headed to site in Milton Keynes to install the fence.

The JCW Absorbent Sound Screen is built to Highway BSEN1793, BSEN1794-1 and BSEN1794-2 towards Highway work clause 2504 and fitted in to steel posts and these screens are a highly effective sound screen for industrial and commercial enclosures.

The project was valued at over £30,000 and was fitted in 13 days, finishing on the 21st December 2016 on budget and on time.
